

# ePN / E-Closing INTEGRATION

## The right eRecording partner can offer countless benefits!

*With ePN, E-Closing customers have access to innovative benefits in addition to traditional eRecording benefits.*

### Enormous Benefits:

Don't miss out on the enormous benefits that eRecording can offer your business. Experience the future of document processing with the E-Closing/ePN integration and revolutionize your title and settlement operations like never before!

When eRecording through ePN, you can process documents in minutes instead of weeks, thanks to a seamless integration with E-Closing's production solutions and the incredible benefits it offers to your title and settlement operation.

### You can take advantage of:

- ePN is seamlessly integrated through E-Closing Connect, making it easier than ever to bring the power of this technology to your workflow.
- Time-saving Automation: Say goodbye to time-consuming processes like keying in indexing information or manually uploading images. eRecording automatically pulls relevant data from your E-Closing solution and securely transmits it to ePN's eCourier, building out the WIP recording package with minimal user intervention.
- Real-time Updates: Stay updated on your recording status with eRecording. E-Closing recording status updates automatically as recording milestones are completed, and 15-minute API increment calls to eCourier provide the most efficient status updates, keeping you informed every step of the way.
- Configurable Notifications: Recording notifications are linked back into E-Closing recording notes and Document Management image repository and can also be configured so that the submitter receives emails, ensuring efficient communication and coordination.
- Innovative Whiteboard Feature: With ePN Whiteboard, you can easily manage all your orders placed through the integration. Sort and filter for quick management of recording workload and use the pre-authenticated ePN Web Submissions button for quick navigation from E-Closing to eCourier.
